H.C. 761 / 24-25 of 10 4th from
D.C. Mysore requests that Govt.
may sanction Rs 5000 from the State
Funds for water supply to Yalwadi town
for which the Municipal Council
of this place have been asked
to provide Rs 5000.

1) The necessity for water supply
has been approved by the Dewan
Please see the Memo No. 10000/10000
at H in the file No 17-24 36 Punjab
Kind reference is also requested
to the note forwarded X in the said
Collection.

2) The Estimates are proposed to be sent
up on the receipt from the Ex. Engr.

3) The M.C. Council of Malavalli town has
been advised, it is stated, to make
a provision of Rs 5000 and the
provision of Rs 5000 equal to the
State Budget for the purpose is
sufficient.

The measure of Rs 5000 is not
one which has been asked for
before. It is to be noted that

The grant of Rs 5000 is not

Ex. 7/4 If the M.C. provides the
Rs 5000 - then the question
of providing Rs 5000 will
have to be considered. The

Serial
No

former point has perhaps
first to be settled.

1714 (26) The question of providing
for this in the State Budget ~~is one to be~~
considered in connection with the funds
for water supply in towns. The prepara-
tion of this scheme will take some
time. It is not known on what basis
the Council has asked for Rs 5000/-
~~for the purpose of the project~~
~~the cost of the project~~ They may just
be asked to send up a project with
details as to how the cost will be met
& if any part left beyond ordinary grant
is found to be required, how the fund
will discharge the same.

Sir,

[Handwritten signature]

With reference to your letter No L 8423/ML 17-24-36

dated the 23rd May 1925, I have the honor to state that the Scheme of water supply to Malvalli Town was placed before the Municipal Council at the meeting held on 7-7-1925 and it was resolved that (1) the bund of Gendekere may be raised to ensure more supply of water to the tank, (2) water may be supplied to Kunnerkatte from Gendekere by means of pipes, and (3) a separate reservoir for the use of Panchamas may be constructed on the southern portion of Gendekere by putting a cross bund. On carrying out the above works, the Council proposes to lay out pipes in the Town for supply of water from Kunneerkatte. Copy of the resolution of the Council is enclosed for perusal.

2 The Executive Engineer, Special Water Supply and Construction Division, Bangalore, has been requested to investigate the entire question and to prepare the necessary estimates. On receipt of these, they will be submitted to Government for sanction.

3 The Municipal Council has been advised to provide Rs 5000/- for this work in their budget for 1926-27. I request that the Government may kindly sanction a similar

grant

In continuation of my letter No H C 761/24-25 dated

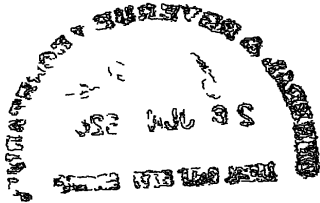

the 10th April 1926, re water supply to Malvalli Town, I have the honor to forward herewith copy of letter No 1508 dated the 14th June 1926, from the Executive Engineer, Special Water Supply and Construction Division, Bangalore. The estimates have been forwarded to the Municipal Council for opinion, and acceptance and provision of half the cost from its funds. As the estimated cost of the Scheme comes to only Rs 20,379/- it is desirable to put the work in hand and complete it before the close of the next year. I therefore request that sanction of Government may kindly be obtained for a grant of Rs 10,000 from State Funds for 1926-27 for the purpose, instead of Rs 5000/- as recommended in my letter of the 9th April 1926 referred to above. The other half of the cost can be met out of Rs 11,000/- at the credit of the Municipality. Resolution of the Council in this behalf will be obtained and submitted to Government early.

2 As regards the particulars called for in your letter No 6815/4 17-24-40 dated 7th May 1926, it is observed that the maintenance cost will not be much as no pumping scheme or elaborate system of distribution is contemplated. The Municipal Council can easily provide for this from its

(21)

Copy of letter No. 1508, dated 12/14th June 1926, from the Executive Engineer, Special Water Supply+Construction Division, Bangalore, to the Deputy Commissioner, Mysore District.

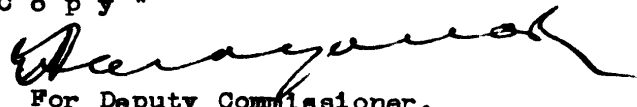

With reference to your No. H.O. 761/24-25 Rev. dated 1-2-1926, stating that Government have directed that the question of Water Supply to Malavalli Town should be taken up immediately and forwarding the proposals of the Municipal Council for investigation and preparation of estimates, I have the honour to forward herewith an estimate amounting to Rs 20,379 with Ferro Copies (Nos. 427, 429 and 430) for improving the Water Supply to Malavalli Town

The report accompanying the estimate explains the details of the project.

The proposal of the Municipal Council to construct a separate reservoir for the use of Panchamas is not desirable and is against the trend of the present day ideas. Again, construction of this separate reservoir will cost some amount which a sum can be advantageously utilised for giving a few taps. The president of the Municipality who was consulted in the matter during my last inspection is also of the same opinion. Hence this has been omitted but separate taps are however provided for their exclusive use.

If the Council accepts the proposals made in the enclosed project, I request that the estimate may be returned countersigned with the moiety of cost provided for the work

Dated Mysore, 16th February 1928

From

T G Rama Iyer, Esq., B.A.,
Deputy Commissioner, Mysore District

one 17-24-43

To

R Ranga Rao, Esq., B.A., B.L.,
General Secretary to the Government of
Mysore, Bangalore.

Sir,

Water-supply scheme of Malavalli Town

I have the honour to state that the question of water-supply to Malavalli Town was taken up in the year 1918, and a project at an estimated cost of Rs 19,200/- was submitted to Government for orders. It was sanctioned by the Government in their order No A 16901-4 Ml 174-17-5 dated 30th June 1919, and a sum of Rs 9600/- was also sanctioned by the Government for the purpose. But as the Council was not then, in a position to finance the scheme, the project had to lie over.

2 On a memorial presented to the Dewan, by a deputation of the residents of Malavalli Town on 16th November 1924 the question of water supply to the Town was once again taken up. The original scheme sanctioned for Rs 19,200/- was placed before the Municipal Council in a meeting held on 7th July 1925, and it was resolved that the Bund of Gendekere may be raised to ensure a larger supply of water to the tank, that water may be supplied to Munneerkatte, from Gendekere by means of pipes, and that a separate reservoir may be constructed for the use of the Ranchamas, on the southern portion of Gendekere tank, by putting a cross bund. Upon this, the Executive Engineer Special Water Supply and Construction was requested to investigate the entire question, and prepare necessary estimates.

3 An estimate amounting to Rs 20,379/- was prepared concerning the construction of a separate reservoir for the use of Ranchamas, but providing for separate taps instead for their exclusive use. This was placed before the Municipal Council for consideration in a meeting.

R T O.

meeting held on 10th July 1926, when the resolution as on
^{reiterated}
 7th July 1927 was ~~reiterated~~ and the construction of a
 separate pond for the use of Adik rnatakes was insisted upon
~~It~~ was also resolved that there was no necessity to lay out
 pipes, and that the Council was prepared to pay a sum of
 Rs 5000/- as its quota towards the entire cost, and that it
 was not in a position to spend more than Rs 108/- as annual
 maintenance charges

4 Consequently the estimates were once again referred
 to the Executive Engineer, for reducing ~~the~~ it to about Rs 10000/-
 But the Executive Engineer replied in his letter No 615 dated
 23rd October 1926, that the estimates could only be brought
 down to Rs 15000/- by raising the weir to 1' only, and by
 omitting the fountains costing about Rs 2863/- and thus reducing
 the efficiency of the scheme

5. The matter was ~~again~~ once again placed before the
 Council, in a meeting held on 9th May 1927, and it was resolved
 to get a new estimate prepared, as the Municipal Council was not
 in a position to finance the scheme prepared by the Executive
 Engineer Accordingly an estimate costing about Rs 9425/-
 has been prepared by a local subover-sser at the instance of the
 Municipality and has been approved by the Council in their meeting
 held on 13th June 1927 A copy of the resolution is forwarded
 herewith for information The Council requests the Government
 to make provision during 1927-28, to the extent of half the cost
 of the estimate viz , Rs 9425/- prepared by its agency

6 I submit herewith the two estimates with accompanying
 reports, for kind perusal and orders

I have the honour to be,
 Sir,
 Your most obedient servant,

Udanna
 Deputy Commissioner,
 Mysore District.

Memo on the project for Improving the Water Supply to Malvalli Town prepared by the Sanitary Inspector of the Municipality.

::: .:::.

The project consists of four main subheads and the difference of cost under each between the provisions made by this department and those made by the Sanitary Inspector is herein explained.

1. Improving Gendekere.-

Provision made by this department	...	12,784/-
by Sanitary Inspector	..	8,739/-

The improvements suggested in both the projects are exactly the same. The capacity of Gendekere is proposed by both to be increased by raising the waste weir by 2'. A spillage of 3' over the waste weir is provided for by us, but, the Sanitary Inspector proposes to have it at only 2'. He has provided for the necessary increase in the length of weir. Thus 52.00 being the F T.L 55.00 is the M W L. in our project, 56.00 is the top of revetment and 58.00 is the top of bund. In order to reduce the cost, the Sanitary Inspector has kept 54.00 as M.W L. He has provided for 1' of revetment above this i.e., upto R.L. 55.00 and only two feet of earth above. Thus the top of bund is 57.00 as against 58.00 in our case.

The top width of the bund has to be kept at 6', particularly in this case, since the water is required for drinking purposes. To reduce cost, the Sanitary Inspector has kept it at 4½', and I feel that the top width is too little. As admitted by him in his report, the maintenance work of the tank is so bad, that at present, some portions of the bund (to a length of about 525') are lower than the present M.W.L. (52.00) and during periods of heavy rainfall, the tank is known to surplus over the bund also. This being the

29)

the case, I do not think it is advisable to reduce either the height or the top width of the bund. Reducing the top width means reducing the thickness of the bund provided the same - slopes are maintained and I would not like to reduce it.

Turfing the rear of the bund and the free board - above the revetment is a necessity since this tends to prevent erosion and washing out of the earth. This item costing about Rs.370/- has been completely ~~om~~ omitted.

For the earthwork, a rate of 0-6-0 a Cyd. was provided by us and this has been reduced in the other estimate to 0-4-0, I am very doubtful if earthwork with the necessary - watering and tamping can be got done so cheaply.

The old revetment is not at all uniform. In some places it has 1 : 1 slope and in others $1\frac{1}{2}$: 1, this department had proposed to remove the revetment where it was not of proper slope and reset it. The Sanitary Inspector has - omitted this provision. He has made a Lumpsum provision of 20 Cyds for repairs here and there. This I am afraid, is not enough.

Consistent with the reduction in the height of bund, the revetment is also reduced.

2. Improving the sluice & providing floating arm.-

Provision in the departmental estimate - 800/-

" Sanitary Inspector's esti.- nil

At present the water from Gendekere flows into the Kunnirkatte through a masonry sluice in the cross bund. There is no means of cutting off the connection between the two nor of cleaning the latter. A floating arm was proposed by us to draw only the surface water and a scour line was proposed to clean it. The Sanitary Inspector has omitted both and in the estimate for improving Gendekere has provided - Rs.25/- for improvements to the sluice cistern. This amount

is

129

is absolutely inadequate for any ~~repair~~ repairs, much less for having some arrangement for cutting off the supply between Kunnirkatte and Gendekere. If this arrangement is not made, the water level in Kunnirkatte will fall down as the water in Gendekere is exhausted and as stated in the report, it may dry up in 5 months.

Again, since water is arranged to be retained in the Katte throughout the year, it is necessary to have some - scouring arrangement to keep it clean. With this device, we can clean the katte every year when Gendekere is full and let in water into it at once.

Hence, I feel it is a great draw back not to have the above provision.

3. Laying pipe line from Kunnirkatte to 6 fountains -
Provision in departmental estimate Rs.2,683/-
" in the other estimate " nil

The necessity for this is clearly explained in the report accompanying the estimate and I have only to repeat what is stated there. The present practice of scrubbing all vessels in the katte and filling them by dipping them in water is absolutely insanitary. Hence it was proposed to supply the water at fountains erected behind the bund. This is a very sanitary arrangement

As regards the supply for Adikarnatakas, it was desired by the Municipality to have a small cross bund just above the waste weir so as to have a pond 25' x 25'. This cross bund would have to be revetted on both sides so as to admit of a discharge over it. It would have to be provided with a proper inlet and scour arrangement so as to keep it clean at all times. The sanitary Inspector has made a provision of Rs.400/- for this and included it under the Improvements to Gendekere. I am afraid the provision is inadequate

for

for the work. To reduce cost, I had proposed to erect two fountains separately for the use of the Adikarnatakas and the cost of this also is included in the above provision of - - Rs.2,863/-.

Establishment, Tools and Plant charges.-

Provision in the departmental estimate Rs. 3,109/-

" in the other estimate " 250/-

According to the standing orders of Government, establishment, tools and plant charges at 18% have to be charged on all works executed for Municipalities. The estimate prepared by the Sanitary Inspector provides a Lumpsum of ₹ 250/- for this. This establishment charge is a necessary obligation, and unless special orders of Government are passed, this cannot be waived, or if the Municipality wants to do the work themselves under the occasional supervision of this department this amount of Rs.3,100/- can be saved to them. I am of the opinion that they may be allowed to do the work themselves as it is very simple. This will save them a good sum.

In general, the works proposed to be executed are - the same in both the estimates except that the erection of - fountains has been omitted in the estimate prepared by the Sanitary Inspector and lumpsum provision of Rs.400/- is made for a separate pond. The provisions under other items are so far reduced as to make the efficiency suffer considerably.

Executive Engineer,
Sanitary and Town Planning Division.

. .

S i r,

With reference to your letter No.D2
109/A.C. dated, the 16th February 1928,
submitting for sanction of Government a
scheme for water supply to Malavalli town
at a cost of Rs.9,425/- prepared by the
Local Sub Overseer, I am directed to state
that the Chief Engineer who was consulted
in the matter considers that it is not
advisable to execute the work as per ---
estimate prepared by the Sub Overseer and
the estimate already prepared by the Exe-
cutive Engineer may be adopted and the work
executed by the Municipality themselves in
stages and that instructions will be given
by the Executive Engineer without levying
any extra establishment charges.

I am therefore to request you to send
revised proposals in the matter for orders
of Government in accordance with the above
view in consultation with the Municipal Cl.

The records are returned herewith
together with a copy of a memo prepared by
the Executive Engineer Sanitary and Town
Planning Division on the project.

I have etc.,

Sir, Water supply scheme - Malavalli Town -

With reference to your letter No L 8949/HL 17-24-44 dated 21st June 1928 on the above subject, I have the honor to state that the Municipal Council in their Meeting held on 18th March 1929 resolved that the Government may be moved to approve of the estimate for Rs 20,379/- as prepared by the Executive Engineer, Sanitary and Town Planning Division on the 11th June 1926. A copy of the resolution together with the estimate and the other records connected with it, ending with report No 238/28-29 dated 18th instant from the President, Municipal Council, Malavalli, is enclosed for reference.

I request that sanction of Government may kindly be obtained to the estimate and the Executive Engineer, Sanitary and Town Planning Division, requested to take further action in the matter.

I have the honor to be,

Sir,

Your most obedient servant,

K V Anantaraman

SIR,

I have the honour to invite your kind reference to the correspondence ending with my letter No D2-109 H C dated the 22/24th May 1929 about the Malavalli Water Supply scheme and to state that the Municipal Councillors met me when I had gone there last time and made representations to me about the possible hardship and inconvenience involved in the project as prepared now. I consider it necessary to examine the details of the project again. I therefore request you to kindly send me the final plans, estimates and other papers relating to the project, which will be returned after examination.

I have the honour to be,
